Introduction

The San José State University School of Information’s “MLIS Skills at Work” report is an annual snapshot analysis of the latest career trends for information professionals.

Data were collected between February and March 2018 through a survey of job duties and qualifications from 400 recent job postings for library and information science (LIS) professionals, sourced from both general and LIS-specific job search sites.

Analysis of the data reveals insights about the current job market and how it is trending, and can help LIS professionals and students prepare themselves to engage in this market either as a job candidate or a hiring decision-maker.
It is our hope that this report will be useful for:

- Future students who may be exploring career paths for information professionals
- Current students getting ready to enter the job market
- Practitioners who are considering how they might expand their career options
- Information center leaders, who are creating and recruiting for tomorrow's jobs
Trends Overview (1)

- Higher education/research institutions and public libraries continue to be the largest employers, but at a somewhat smaller percentage (58% of 2018 postings versus 62% in 2017 postings) overall.

- However, other employer categories continue to increase their LIS recruiting and job opportunities; for example:
  - Government/military employers expanded their job postings from 9% (2017) to 14% (2018) of the 400 reviewed, an increase of 20%.
  - Corporate/business employers increased their job postings by 8% between 2017 (12%) and 2018 (13%).
  - Although still representing a small number of the total, medical/pharma/scientific openings doubled from 2017’s 1% to 2% in 2018.
As with the 2016 and 2017 “MLIS Skills at Work” reports, the most in-demand skill set across all jobs was “Communication/Interpersonal Skills”.

Further reflecting the importance of people skills to today’s LIS jobs, “Collaboration/Teamwork” became #2 on 2018’s most-desired-skills list, while 2017’s knowledge of “Integrated Library Systems/Software/Technology Experience/Management” dropped from #2 to #6.

Continuing to reflect the team-focused nature of LIS work, “Collaborating and Liaising” was once again the most frequently listed job duty, as it was in 2016 and 2017.

Having an MLIS provided even more of a job-hunting edge: whereas 85% of job postings either required or preferred candidates with an MLIS in 2017, in 2018 an impressive 91% of jobs fell into that category.
One of the most important issues for new graduates doing a job search is whether or not jobs require relevant experience (as distinct from requiring an MLIS). This year’s data show that:

- These substantial changes in experience being required vs preferred indicate that employers are shifting to an expectation that applicants will have at least some level of previous, relevant work experience.

- **Takeaway for students:** if at all possible, do at least some volunteer or part-time work in your area of interest before you begin job-hunting. Virtual or onsite internships are another excellent way to gain not only relevant job experience, but also expand your network of contacts and professional visibility.
Data Analysis and Presentation of Findings

The following 9 slides address these key data points:

- Types of Employing Organizations
- Expanding Opportunity: Archival Job Employers
- Representative Job Titles
- Skills Most In Demand By Employers
- Representative Specialized Skills
- Job Duties Listed Most Frequently
- MLIS Required or Preferred
- Job-Specific Experience Requirements
Types of Employing Organizations

Universities, colleges and public libraries made up 58% of the job postings. However, opportunities are steadily rising in government, business, and K-12 schools.
Expanding Opportunity: Archival Job Employers

In 2018, archival positions were found across all organizational types, with the highest percentage of job opportunities in universities and colleges (47%), government (16%) and public libraries (12%). However, businesses are also recognizing the value of archives (8%).
As you will see in the following “MLIS Skills at Work” report analyses, Library and Information Science (LIS)-related jobs are found in many job listings or opportunities that don’t necessarily include the word “library,” although many do. The following representative job titles reflect some of the diverse ways LIS knowledge is being applied:

- Archivist (Archive Assistant; Archival Digitization Specialist; Corporate Archivist; Curator of Archives; Digital Archivist; Lead Processing Archivist)
- Cataloging (Cataloger; Cataloging and Metadata Librarian; Music Cataloger; Principal Cataloger and Linked Data Strategist)
- Communications Specialist/Writer
- Conflicts Analyst
- Content Developer
- Curator of Oral Histories
- Data Collection Manager
- Digital Asset Management
- Digital Initiatives Program Manager
- Document/Data Control Analyst
Representative Job Titles (2)

- Due Diligence/Fraud Research Specialist
- Emerging Technology Librarian
- Information Technology Specialist
- Knowledge Center Head of Operations
- Librarian (Access Services Librarian; Business Librarian; Children’s/Youth Librarian; Medical Librarian; Reference Librarian; Special Collections Librarian; Technical Librarian)
- Library Product Manager
- Litigation Intelligence Analyst
- Social Media Specialist
- Technology Hub Administrative Staff
- User Experience (UX) Lead
- Workflow Analyst/Programmer
Representative Specialized Skills

Similar to the diverse representative LIS job skills identified on slides 11 and 12, the more-specialized skills/duties noted below occurred throughout the job listings.

Note: *copyright expertise* and *instructional design* were the specialized skills cited most often.

- Accessibility/Assistive Technologies
- Art Curation
- Audio/Visual Preservation
- Business Analysis
- Classical Music/Music History
- Communications/Design
- Competitive Intelligence
- Copyright Expertise
- Digital Humanities
- GIS
- Grant Writing/Management
- History Research
- Instructional Design
- Legal Research
- Literacy
- Marketing/Media Strategy
- Medical Device Regulatory Compliance
- Rare Materials Preservation
- Scholarly Publishing
- Science/Health/Pharmaceutical Research
- Social Media
- Statistical Software
- Storytelling
- Systems Administration
- Theology
Job Duties Listed Most Frequently

- Collaboration/Liaising
- Training Instruction/Developing or Delivering Content
- Reference/Research/Reader’s Advisory
- Outreach/Program Development
- Collection Development/Acquisitions
- Personnel/Volunteer Management/Supervision
- Strategic Planning/Goal Setting/Policy Development
- Cataloguing/Classification/Indexing/Taxonomy
- Archives/Records Management
- Community Collaboration
- Data Collection/Analysis/Reporting/Metrics
- Digital Collection/Asset Management/Digitizing
- Data/Databases/Metadata Creation/Management
- Leadership/Management
83% of the 400 job postings collected either required or preferred candidates with an MLIS degree.
**Job-Specific Experience Requirements**

The trend of employers requiring candidates to have “job-specific experience” (for example, in cataloging, bibliographic instruction, outreach, etc.), continued in 2018.

Bottom line: the data confirm that employers are shifting away from a *preferred* to a *required* level of experience. This is yet another compelling reason to make sure you incorporate a virtual or onsite internship into your iSchool program planning if you don’t already have the requisite experience.

<table>
<thead>

</tr>
</tbody>
</table>
The following 21 slides present specific job titles, duties, and skills filtered from job postings. They are categorized first by type of work activity or role and second by type of employing organization or environment.

This data snapshot provides a representative but detailed sample of current LIS employment opportunities; demonstrates the diversity of responsibilities associated with current jobs; highlights desired skills employers are looking for in job candidates and duties associated with the position; and provides sampled information on technologies currently in use across organizations including software, systems, standards, and markup languages, among others.

Job posting selection was based on a subjective analysis of all open positions in an attempt to provide information on a wide variety of job titles across organizations. As you will see, there may be overlap in regards to job titles, skills, duty performance, and technologies.
Drawn from analysis of 400 job postings, the following 11 slides present a detailed overview of Library and Information Science (LIS)-related jobs based on the type of work activity or role performed.

This approach is designed to help you understand the many ways a specific LIS skill set (or area of interest) may be deployed across a wide range of opportunities and employers.

See slides 32-29 for an alternative interpretation of the data, that is, based on the type of employer or employing organization.
# Collection, Acquisition and Circulation

## Sample Job Titles

- Collections Development Coordinator
- Interlibrary Loan, Archives and Circulation Specialist
- Circulation Supervisor
- Acquisitions Librarian
- Serials and Electronic Resources Librarian
- Acquisition Specialist
- Collection Development Librarian
- Library Associate
- Collections Research Curator
- Librarian I (Collection and Metadata)

## Sample Job Duties

<table>
<thead>
<tr>
<th>Duties</th>
<th>Skills</th>
<th>Technology/Standards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Selection and ordering of books, serials, electronic materials, resources and gifts; review materials upon receipt</td>
<td>Experience developing strategies for collection development and acquisition in Library or Archives environment with varied formats (print, digital, and audiovisual resources)</td>
<td>Ex Libris Library Management System (ALMA); Commercial and Open Source (ILS) Systems</td>
</tr>
<tr>
<td>Assist patrons with interlibrary loan requests in person, by phone, and email</td>
<td>Demonstrated ability to provide high-quality customer service</td>
<td>Microsoft Office Software (Word, Excel, Outlook)</td>
</tr>
<tr>
<td>Review and evaluate e-resources for library acquisitions or e-access; renew licenses and develop best practices for consortia acquisition purchases</td>
<td>Experience managing fiscal resources to create budgets and track income and expenditures</td>
<td>Primo; OCLC</td>
</tr>
<tr>
<td>Orders, renews, and processes all current online and print subscriptions, including claims for non-receipt of issues and replacement of lost issues</td>
<td>Experience with the Ex Libris Library Management System (ALMA); familiarity with databases and web-based resources; ability to populate Integrated Library Systems (ILS) database using government modified standards</td>
<td>ProQuest; EBSCO</td>
</tr>
<tr>
<td>Utilizes vendor services and professional tools to evaluate and select materials and resources in various physical and digital formats across age groups</td>
<td>Requires problem solving, organizational and analytical skills, and an aptitude for detail-oriented work; skill in interpreting data from many sources in analyzing collection needs</td>
<td>HTML, Javascript</td>
</tr>
</tbody>
</table>

## Sample Job Skills

- Experience developing strategies for collection development and acquisition in Library or Archives environment with varied formats (print, digital, and audiovisual resources)
- Demonstrated ability to provide high-quality customer service
- Experience managing fiscal resources to create budgets and track income and expenditures
- Experience with the Ex Libris Library Management System (ALMA); familiarity with databases and web-based resources; ability to populate Integrated Library Systems (ILS) database using government modified standards
- Requires problem solving, organizational and analytical skills, and an aptitude for detail-oriented work; skill in interpreting data from many sources in analyzing collection needs
## Cataloging and Metadata

### Sample Job Titles

- Cataloging and Metadata Librarian
- Coordinator – Cataloging and Metadata
- Cataloging Metadata Electronic Resources Librarian
- Cataloging and Metadata Specialist
- Metadata Librarian
- Archives Cataloger
- Cataloging Librarian
- Manager of Library Archives and Cataloging
- Reference Cataloging Librarian
- Cataloging Project Manager

### Sample Job Duties

<td>Resource Description and Access (RDA); AACR2 cataloging rules; Descriptive Cataloging of Rare Books (DCRM) standards</td>
</tr>
<tr>
<td>Manages the cataloging of new materials for the library collection, with responsibility for complex and original cataloging in all formats</td>
<td>Experience digitizing materials and managing a digital collection and other digital library-related tasks</td>
<td>Microsoft Office Software (Word, Excel, Outlook)</td>
</tr>
<tr>
<td>Contribute to strategic planning, policy discussion, and documentation</td>
<td>Evidence of leadership and aptitude in the field of library metadata services</td>
<td>MARCEdit; Cataloger’s Desktop; OCLC Connexion; LCSH; LCC; MARC 21 coding; Classification Web</td>
</tr>
<tr>
<td>Cataloging, classification, authority control, metadata, database maintenance</td>
<td>Excellent communication, interpersonal, organizational, and analytical skills</td>
<td>WorldCat</td>
</tr>
<tr>
<td>Assists in training new or existing staff in cataloging</td>
<td>Advanced knowledge of cataloging rules, standards and practices, including Resource Description and Access (RDA)</td>
<td>Cataloging and Metadata standards - Metadata Objective Descriptive Schema (MODS); BIBFRAME; MARC</td>
</tr>
</tbody>
</table>
# Reference and Research

## Sample Job Titles

- Reference Librarian
- Manuscript Reference Librarian
- Reference and Research Librarian
- Reference and Instruction Librarian
- Law Firm Research Librarian
- Information Research Specialist
- Legal Technology and Research Librarian
- Adult Services Reference Librarian
- Assistant Librarian – Coordinator of Reference Services
- Research and Instructional Services Librarian

## Sample Job Duties

<table>
<thead>
<tr>
<th>Sample Job Duties</th>
<th>Sample Job Skills</th>

</thead>
<tbody>
<tr>
<td>Select, manage, and evaluate information resources that support the curricular and research needs of the faculty and students of assigned departments</td>
<td>Experience providing reference service to patrons; must be able to provide library services in English and Spanish</td>
<td>Westlaw; LEXIS</td>
</tr>
<tr>
<td>Provides programming and outreach to meet the needs of a culturally, ethnically and linguistically diverse community</td>
<td>Experience searching medical databases such as MEDLINE and Embase</td>
<td>Microsoft Office Software (Word, Excel, Outlook)</td>
</tr>
<tr>
<td>Assists scholars and researchers in finding significant records relating to the subject under consideration, and advises them of relevant records in both the Manuscript Division and in other repositories</td>
<td>Knowledge of the principles, concepts, and techniques of library science</td>
<td>Statistical Analysis Software (SAS, Stata)</td>
</tr>
<tr>
<td>Perform statistical analyses and create data visualization representing research and analysis</td>
<td>Experience with tools and strategies for searching literature databases and other third-party sources</td>
<td>Springshare LibGuides; GALILEO</td>
</tr>
<tr>
<td>Research topics for lawyers writing articles and presenting speeches</td>
<td>Expert proficiency in online, case law research and legal databases</td>
<td>MEDLINE/PubMed; CINAHL; EBSCO; ProQuest</td>
</tr>
</tbody>
</table>
# Outreach, Programming and Instruction

## Sample Job Titles

- Programming and Outreach Librarian
- Instructional Outreach Librarian
- Outreach and Academic Engagement Librarian
- Outreach Archivist
- Librarian II – Reference Outreach
- Outreach Librarian
- Instruction Librarian/Archivist
- Research and Instructional Services Librarian
- Lower School Instruction Technologist and Assistant Librarian

## Sample Job Duties

<table>
<thead>
<tr>

<tbody>
<tr>
<td>Create and deliver programs that enhance the library’s role in student instruction, faculty scholarship, and staff initiatives</td>
<td>Effective communication and presentation skills</td>
<td>Springshare LibGuides</td>
</tr>
<tr>
<td>Provide instruction and reference services; work collaboratively with staff throughout the library to demonstrate the value of the library</td>
<td>Experience teaching library instruction using information literacy concepts; working knowledge of a variety of electronic databases and technology applications</td>
<td>Microsoft Office Software (Word, Excel, Outlook)</td>
</tr>
<tr>
<td>Provide on-site digitization service and oral history recording for members of the community who want to share their personal artifacts and stories</td>
<td>Leadership skills and the ability to take ownership of a project within a complex administrative structure</td>
<td>Hypertext Markup Language (HTML); Cascading Style Sheets (CSS); Content Management System (CMS)</td>
</tr>
<tr>
<td>Create LibGuides and other instructional aides to promote the use of Special Collections and University Archives materials to support the curriculum</td>
<td>Demonstrated understanding of active learning pedagogies and/or inquiry-based learning</td>
<td>SoundCloud; Libsyn (digital audio recording software)</td>
</tr>
<tr>
<td>Develop and facilitate outreach programs and act as a liaison with library, university and/or community groups to coordinate and promote library instruction</td>
<td>Demonstrated organization and problem-solving skills</td>
<td>Adobe Photoshop; Twitter, Facebook, Pinterest (Social Media); ListServ; Google Analytics</td>
</tr>
</tbody>
</table>
### Sample Job Titles

- Manager Collection Management
- Library Director
- Director
- Director of Children’s, Youth and Family Programs
- Information and Research Section Manager
- Senior Librarian/Children’s Manager
- Library Project Manager
- Manager of Library Archives and Cataloging
- Resource Center Director (Future Ready Librarian)

<table>
<thead>

Information Systems and Technology

**Sample Job Titles**
- Part-Time Librarian/Technology Specialist
- Legal Technology and Research Librarian
- ILS Systems Librarian/System Administrator
- Metadata Librarian
- Discovery and Delivery Systems Librarian

**Sample Job Duties**
- Performs data entry and more complex functions associated with online catalog maintenance and integrated library/print management systems
- Customize Discovery Layer interface using HTML and Javascript
- Analyze discovery requirements for digital library projects, identifying and mitigating obstacles to efficient metadata workflows
- Maintain digital collection software; in conjunction with the DHI Lead Designer and Software Engineer, Library Information Systems Specialist, and Unix/HPC System Administrator, responsible for maintenance and configuration of digital collections software

**Sample Job Skills**
- Data Conception: Requires ability to compare and/or judge the readily observable functional, technical, structural, or compositional characteristics (whether similar to or divergent from obvious standards) of data, people, or things
- Demonstrated experience supporting web technologies such as HTML, XML, Javascript, and/or CSS
- Familiar with linked data concepts and Semantic Web
- Experience with the Alma LSP (Ex-Libris)

**Sample Technology/Standards**
- Hypertext Markup Language (HTML);
- Cascading Style Sheets (CSS);
- ArchivesSpace; PRIMO; Ex-Libris (ALMA LSP)
- Online Computer Library Center (OCLC) Identifier Management Systems – Library of Congress Name Authority File (LC/NAF), ORCID, ISNI, DOI
- Javascript; Extensible Markup Language (XML)
- Metadata Objective Descriptive Schema (MODS);
- Unix/Linus Operating System;
- Integrated Library Systems (ILS)
# Web Services, User Experience and Social Media

## Sample Job Titles

- Senior Research Assistant and Information Specialist
- Instructional Outreach Librarian
- Special Collections and Digital Initiatives Librarian
- Librarian III
- Head of Law Library Technology
- Web Services Librarian
- Engagement and Inclusion Librarian
- User Experience (UX) Manager
- Online Content Lead
- Social Media/Promotion Specialist

## Sample Job Duties

<table>

</table>
As noted, many activities and types of LIS work may be found across a diverse spectrum of employers and organizations, including education institutions, corporations, nonprofits, community and civic foundations, research centers, and more.

Drawn from analysis of 400 job postings, the following 8 slides present a detailed overview of Library and Information Science (LIS)-related jobs based on the type of employer or organization for which the work is performed.
### Public Libraries

#### Sample Job Titles
- Public Services Supervisor
- Youth Services Librarian
- Public Education Program Coordinator
- Reference Librarian
- Young Adult Librarian
- Part-time Outreach Archivist
- Digital Projects Librarian
- Acquisitions Librarian
- City Librarian
- Adult Services Librarian
- Global Reading Challenge Librarian

Recommendations for LIS Job Seekers (1)

Where to start

- Do not underestimate the value of non-LIS experience. The information profession welcomes diverse candidates from various backgrounds. Explore LIS career pathways on the SJSU iSchool website at http://ischool.sjsu.edu/current-students/career-pathways to gain a broad understanding of LIS opportunities.

- Develop your resume. Think about and make a list of the skills you have gained and the duties you have performed through work, school, personal interest, volunteer positions, internships, and extracurricular activities. Compare the information you have collected with the information contained in this presentation to discover transitional skills or duties you can highlight on your resume or discuss in a cover letter or interview.
Recommendations for LIS Job Seekers (2)

Expand the scope of your job search by developing a search strategy and networking

- Use more than one keyword or phrase to search for jobs to save time and help avoid frustration. Before you sit down to perform a job search on the internet, draft a list of keywords and concepts to help you formulate search terms. Use those concepts to help come up with alternative words or phrases to describe specific LIS skills and terminology related to the information profession.

- Review and evaluate the platform/interface of the job site. Consider what kind of search filters the site provides to help refine your search results. Test the search capabilities of the site to discover whether the database allows you to use Boolean operators such as AND, OR, NOT, or NEAR to help limit or broaden your search results.

- Use your communication and collaboration skills to network with others. Begin developing a professional network while you are a student. Get to know and talk to your classmates. Participate in school functions and activities. Become a student member of at least one national professional association and join its local/state chapter. Attend meetings, conferences, and activities when you can. This is a great way to get to know and network with professionals in your area and find out about jobs not being advertised on job boards or websites.
Recommendations for LIS Job Seekers (3)

Always be on the lookout for ways to develop LIS-related skills

- Enroll in an internship for credit or apply to be involved with a special project offered through the San José State University iSchool. Contact a local cultural organization, library, or archive and inquire about volunteer/internship opportunities. Use these experiences to develop or expand your skill sets. Virtual or onsite internships, in particular, offer opportunities to practice and master professional-level skills while also building important career relationships.

- Be open and committed to lifelong learning. Begin paying attention to current trends within the information profession. Employers are looking for candidates who are interested in new trends and technologies across all organization types. Employers consider “trendspotting” a skill. One of the key phrases employers frequently used to describe this skill in job postings is “Demonstrated interest in current trends, technologies, and practices.”

- Discover and practice using new technologies in the classroom and on your personal time. If course assignments call for the use of various technologies, choose to use the one with which you are unfamiliar. Take the time to explore different web tools, applications, databases, and electronic devices. Last year, “basic computer/internet skills” was #5 on the in-demand skills list. In 2018, it dropped to #10. The 5th most sought after skill this year is knowledge of “electronic resources, web applications, and software.” Employers are looking for candidates who are continually expanding their technological knowledge. Why not get a jumpstart on this skill?
Practice, practice, practice

- Find as many opportunities to practice training/teaching and developing/delivering instructional content as you can while you are a student. Read about, research, and gain a solid understanding of information literacy and teaching theory/techniques.

- Review and evaluate websites and reference/research materials (electronic and print) for relevance and value to expand your reference/research knowledge. Practice using advanced searching techniques and search strategies in a variety of different resource databases (subscription and open source) to familiarize yourself with different technologies that offer reliable source material.

- Practice both your LIS-specific skills and your soft skills such as collaboration, communication, and positive engagement at every opportunity during internships.
Finally,

- *If at all possible, do not graduate without having gained at least a minimal amount of work experience* in a library or other organization, preferably in the type of library or organization for which you’d like to work.

- Alternatively, gain work experience doing the type of work for which you’d like to be hired, such as cataloging, digital preservation, archival processing, web development, instruction, or other work of interest to you.

*NOTE: Even if the only work experience you can manage while a student is through an internship or volunteering, this will substantially improve your job prospects.*
Methodology Overview

- 400 job postings, representing 43 states plus Washington, D.C., were gathered over an eight-week period during February and March 2018.

- LIS-specific and general job-listing sites were visited on a rotating timetable so that postings were collected from each site over a period of time.

- Several new job search sites were added to the study this year, including LENSA, Higher Education Recruitment Consortium (HERC), and HR Crossing.

- Job listings from any site were excluded if they did not contain any LIS-related duties or skills.
Data Collection

- Searches produced job listings at an assortment of organizations, including hospitals, law firms, government agencies such as the CIA and Library of Congress, and nonprofit organizations such as the Archdiocese of Cincinnati, The Los Angeles Philharmonic Association, and The Academy of Motion Picture Arts and Sciences.

- Job listings from a vast array of employers across a number of sectors were, understandably, not consistent in format or vocabulary – especially within the Duties and Skills sections. Throughout this inherently subjective activity, however, every effort was made to ensure the maximum consistency possible.
Data Analysis: Data Points

For each job listing, the following data points were recorded:

- Employer Name, State, Type
- Position Title, Job Type
- Previous Job-Specific Experience – Required, Preferred, Not Required, Not Specified
- MLIS Degree – Required, Preferred, Not Required, Not Specified
- Position Duties
- Skills Required/Desired
