

Online Learning Environment

- “The flexibility of the online learning environment, the diversity of students and faculty, and the team of teachers who are knowledgeable and resourceful make SJSU a great choice. The program is rich with resources, offers a rigorous and collaborative learning environment, engaging and supportive professors (mostly), and the opportunity to connect globally to other information professionals and learners. Overall, a wonderful learning experience.”
- “It is a good learning environment which crosses well between synchronous and asynchronous needs and individual preference for classroom vs. digital interfaces in an asynchronous forum.”
