Technology

- Learning about all of this technology was beneficial, and I know it will help me in my career.

- The diversity of classes, with an emphasis on technology, was great preparation for constant change and new skills.

- The program enabled me to understand the technology I will be working with, and learn how to learn about new technologies.

- I would recommend the program because of the tech immersion environment, which prepares students to work in information fields that are becoming increasingly dependent on distance technology to create content, guide others, and teach.
