“In addition to the flexibility of online coursework, I appreciate having had the opportunity to attend several presentations online with guest speakers discussing their work experiences in a particular career pathway or information environment and providing information about a specific career pathway and helpful tips regarding skills required in their position and in the information environment they work in.”

“I had several fantastic teachers! Professor Dean, Dr. Chen, Dr. Bolin, Professor Disher just to name a few.”

“I learned a great deal about the field and was exposed to new aspects of it, had opportunities for internships which I could use to build my resume, and met really wonderful students and teachers.”

“I think the faculty is well put together with a great team of professional educators in the MLIS field. I was especially impressed with Professor's Mary Bolin, and Todd Gilman.”

“I found the iSchool program valuable, both in content and in terms of return on investment, given the market's LIS salaries. The program is well designed, the instructors are top-notch, the format is challenging and demands organization and planning on the students' end. Even though I wished I could have the time to serve longer in committees and engage in an internship, I am pleased with my education at SJSU and I would be glad to become an ambassador and refer SJSU to prospective candidates.”
